

WHCC frames are another option to receive a complete product that is ready to deliver to your client the moment you open the WHCC box! Order your next photographic print with a frame and choose from one of our four frame color options - black, cherry, bronze, or iron. We'll assemble the photographic print into the frame as a full image with or without acrylic or with a double white mat with acrylic. These wooden frames are available in six sizes – 11x14, 10x20, 12x18, 16x16, 16x20, and 20x24 with various print and mat opening options. Mats are acid free and archival and all frames are a 2 inch moulding. This means if you order a 16x20 frame, it will take up a 20x24 space on a wall. The inside opening is 16x20 and can be filled with a full 16x20 print or a 16x20 mat with an 8x10, 11x14, or 10x15 print. All frame orders are shipped assembled and complete with hanging hardware via UPS Ground.

Our frames are manufactured by GNP Frame, the premiere wholesale frame manufacturer in the photographic industry. We have hand selected a collection of deluxe solid wood 2 inch mouldings from the Lexington series.

Order a frame corner sample kit through ROES for only \$25. The kit includes a corner of each of the four moulding options as well as a sample of the double white mat.

Order framed photographic prints using WHCC ROES and selecting the framing catalog. Choose your frame size, frame color, optional mat, and optional acrylic.

Additional print options are available for framing. In ROES, choose to order a lustre or metallic photographic print complete with lustre coating and texture options. Lustre or Metallic Canvas Masonite is also available. Additional charges will apply for metallic paper and any finishing services. Prints ordered without acrylic will be mounted on Foamboard.

Lustre Prints on Foam

Size	11x14	10x20	12x18	16x16	16x20	20x24
