Photographic Prints

- All photographic prints have the filename on the back of the print.
- Lustre, Glossy and Metallic papers can be combined within an order.
- Prints are created with printers that expose light sensitive paper that is then run through a chemical process. These are real photographs, not inkjet prints.

Corrective Services

Basic retouching, artwork, and file color correction services are available. Basic retouching removes slight skin imperfections such as blemishes. Basic retouching can be ordered per file.

Artwork is quoted for projects such as extensive retouching, head swaps, and background adjustments. Artwork can be ordered per file. Please allow for additional time for this service.

Per file color correction is available. We color correct the entire file for balanced skin tones without causing blown out or color casted highlights. When ordering color correction, all files in the order will be color corrected.

Basic retouching, artwork, and color correction orders can be archived to CD. Corrective Services are not required to order an archive CD. Drop shipping is not available when archive to CD is ordered.
